No. 7300001

THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

Keystone Seed Company

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF seventeen YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

ONION

'Scanion'

In Testimony Whereof, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington *this* 15th *day of* November *in the year of our Lord one thousand nine hundred and* seventy-four

Attest:

Commissioner
Plant Variety Protection Office
Grain Division
Agricultural Marketing Service

Secretary of Agriculture

ONION VARIETY ~~'1401'~~ 'Scanion'

Application No. 73001

Exhibit 12a

In 1963 a single non-bulbing plant was found in a large population of Southport White Globe. This single plant was selfed (S-1) in 1964. In 1966 a non-bulbing plant was selected from the progeny of (S-1) above and this plant was selfed (S-2). In 1968 the progeny from (S-2) were massed and this became the foundation seed for ~~'1401'~~ 'Scanion'. Bulbing was a variant in the progeny of (S-1). It occurred at a low frequency. Three massed generations subsequent to (S-2) indicated stability for non-bulbing character south of 38 degrees north latitude.

ONION VARIETY '~~1401~~' 'Scanion'

Application No. 73001

Exhibit 12b

The seed of 'Scanion' '~~1401~~' is similar to Southport White Globe except that it is slightly larger. Weight of 100 seeds of 'Scanion' '~~1401~~' averages 0.48 grams while 100 seeds of Southport White Globe averages 0.41 grams. Seeds of 'Scanion' '~~1401~~' are 3.5 mm long by 2.5 mm wide and 2 mm in thickness. They are dull black in color and roughly three sided with two pointed projections at the placental attachment end.

The cotyledon of 20 day old seedlings averages 11.1 cm. in length for 'Scanion' '~~1401~~' and 9.7 cm. for Southport White Globe. At this same stage of growth the first true leaf of 'Scanion' '~~1401~~' averages 13.2 mm while that of Southport White Globe averages 12.5 mm.

The inflorescence is similar to Southport White Globe except that umbels of 'Scanion' '~~1401~~' are greater in diameter. 'Scanion' '~~1401~~' averages 7.8 cm. across while that of Southport White Globe averages 7.0 cm. The maximum number of umbels per plant is two and the average is one. The umbels are relatively compact and the petals are white with a green stripe and the sepals pointed but not extremely so. The spathe has a medium to long beak. Umbel and seeds mature 10 days later than Southport White Globe.

The leaf of 'Scanion' '~~1401~~' is similar to that of Southport White Globe both measuring 50 cm. in length and 8 mm. wide. The scape is slightly shorter on 'Scanion' '~~1401~~' under good growing conditions but may be the same length when conditions are not too favorable for rapid growth.

The scape of 'Scanion ~~1401~~' has a bluish green appearance while that of Southport White Globe is green but lacks the bluish reflectance.

The torus of the umble of Southport White Globe is not as rounded as that of 'Scanion ~~1401~~'.

'Scanion ~~1401~~' is bunching type onion and is best adapted south of 38 degrees North latitude under long day conditions.

The cured stage is of a medium size and similar to a torpedo-long oval as Italian Red. The color of the skin and of the interior is white like Southport White Globe. The scales are few and of medium thickness. Scale retention is good. Pungence is like Crystal Wax or Southport White Globe. Storage is poor.

The mature plant at flowering stage ususally has 1 scape but may also have a vestigial scape, while Southport White Globe usually has 2 scapes which will mature with an additional vestigial scape.

'Scanion ~~1401~~' most closely resembles Southport White Globe in gross morphology of upper parts except that:

'Scanion ~~1401~~' holds bunching stage much longer than Southport White Globe south of 38 degrees North latitude.

This we believe makes it a distinct variety. Also other points of distinction are:

1. Seed maturity is 10 days later
2. Diameter of umbels averages 7.8 cm. while that of Southport White Globe averages 7.0 cm.
3. The torus of the umbel is more rounded than in Southport White Globe
4. 'Scanion ~~1401~~' usually produces 1 scape and 1 vestigial scape while Southport White Globe usually produces 2 scapes with one vestigial.

ONION VARIETY 'Scanion ~~1401~~'

Application No. 73001

Exhibit 12d

Data Indicative of Novelty:

Novelty is based on the following characteristics:

'Scanion ~~1401~~' most closely resembles Southport White Globe except that it does not form a bulb in area South of 38 degrees North latitude before prime bunching stage is passed; seed maturity is 10 days later; diameter of umbels in greater; torus of the umbel is more rounded; 'Scanion ~~1401~~' usually produces one scape while Southport White Globe usually produces two scapes.

Scanion
ONION VARIETY '~~1401~~'

Application No. 73001

Exhibit 12e

Statement of Applicant's ownership

Keystone Seed Co. believes it is the sole, original and first breeder of '~~1401~~' variety of onion for which it solicits a certificate of protection.
Scanion

PLANT VARIETY PROTECTION CERTIFICATE

ASSIGNMENT

The Sunseeds Division of Agrigenetics Corporation, a Delaware corporation having a place of business at 3575 Mitchell Lane, Boulder, Colorado 80301 ("Agrigenetics"), represents that it is the owner of the entire right, title and interest in and to the plant variety protection certificates and applications for plant variety protection certificates shown below.

For good and valuable consideration, receipt of which is hereby acknowledged, Agrigenetics hereby assigns to UF Genetics, Inc., a Delaware corporation having a place of business at 9800 Fairview Road, Hollister, California 95024, Agrigenetics' entire right, title and interest in and to the following plant variety protection certificates and applications therefore, together with all Agrigenetics' rights to the sexually reproduced plants that are the subject of such certificates and applications:

Plant Variety Protection Office
National Agriculture
Library Building, Room 500
Beltsville, MD 20705

Re: Change of Assignment.

Dear Mr. Evans:

This letter is in reference to your correspondence to me, dated July 14, 1987. I wish to make it clear that this change of assignment is to indicate a name change only, from U.F. Genetics, Inc. to Sunseeds Genetics, Inc.

Also, in reference to 'Mystro' tomato, have Item 1 read Sunseeds Genetics, Inc. and issue the certificate to Sunseeds Genetics, Inc.

Enclosed please find a check in the amount of $170.00 to cover the cost of changing the certificates.

Copy of Correspondence from K.H. Evans

Agreement (the "Agreement"), a copy of which is attached hereto as "Exhibit A" and is incorporated herein by this reference. Under the terms of the Agreement, Sunseeds granted to Security Pacific, as Agent for Banks, a security interest in any and all right, title, and interest in, to, and under all Certificates of Plant Variety Protection granted to Sunseeds and/or any of its predecessors in interest, subsidiaries, and/or divisions, including, but not limited to, the following Certificates of Plant Variety Protection, copies of which are attached hereto as "Exhibit B":

Certificate Number	Date Issued	Grantee	Variety Protected
8800057	9-30-88	Sunseeds Genetics, Inc.	"Prima Belle" Pepper
8500064	9-30-87	Sunseeds Genetics, Inc.	"Mystro" Tomato
8300168	9-27-85	Sunseeds, A Division of Agrigenetics	"Cajun Queen" Okra
7900067	7-26-79	Keystone Seed Co., Inc.	"Commander" Lettuce
7600053	8-24-77	Keystone Seed Company	"Costaverde" Lettuce
7600055	5-31-77	Keystone Seed Company	"Mesaverde" Lettuce
7600052	5-16-77	Keystone Seed Company	"Chaparral" Lettuce
7300001	11-15-74	Keystone Seed Company	"Scanion" Onion

7300016	4-10-73	Keystone Seed Company	"Picoverde" Lettuce

6. In addition, under the terms of the Supplementary Security Agreement, Sunseeds has granted to Agent, on behalf of Banks, a security interest in any and all right, title, and interest in, to, and under all of Sunseeds' Applications for Plant Variety Protection currently pending with the United States Department of Agriculture, Plant Variety Protection Office, including, but not limited to, the following Applications, copies of which are attached hereto as "Exhibit C":

Application Number	Filing Date	Applicant	Variety
8900171	4-18-89	Sunseeds Genetics, Inc.	"White Diamond" Cauliflower
8700194	8-24-87	Sunseeds Genetics, Inc.	"Sunex 1643" Tomato

6. This Affidavit is to evidence the transfer of a security interest only, and does not reflect the transfer of any other interest in the above-referenced Certificates and Applications.

Dated: December 15, 1989.

Roderick N. Stacey

Roderick N. Stacey

AFFIDAVIT

Roderick N. Stacey, being first duly sworn, says:

1. I am the President and Chief Executive Officer of Sunseeds Genetics, Inc. ("Sunseeds"), a corporation organized and existing pursuant to the laws of the state of Delaware, and having its principal place of business in Hollister, California. I am authorized to make this affidavit on behalf of Sunseeds.

2. Sunseeds is a former division of Agrigenetics Corporation and is successor to certain Certificates of Plant Variety Protection granted to Agrigenetics Corporation, including, but not limited to, those Certificates listed in paragraph number five (5) of this affidavit which designate Agrigenetics Corporation as a grantee.

3. Sunseeds has acquired by merger or purchase all of the Certificates of Plant Variety Protection listed in Paragraph number five (5) of this affidavit.

4. Sunseeds, Security Pacific National Bank, ("Security Pacific"), Cooperatieve Centrale Raiffeisen-Boerenleenbank, B.A., New York Branch ("Rabobank Nederland"), and Caisse Nationale De Credit Agricole ("Credit Agricole") (Security Pacific, Rabobank Nederland, and Credit Agricole are collectively referred to as the "Banks") and Security Pacific as Agent for the Banks, are parties to a Credit Agreement dated as of January 6, 1989.

5. As of August 3, 1989, Sunseeds and Security Pacific as Agent for the Banks, entered into a Supplementary Security

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and $250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.

13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.

13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.

13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.

13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.

13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

6. BULB:

[2][0] AVERAGE NUMBER BULBS PER METER

[2] Size (Harvest): 1 = SMALL (Red Creole) 2 = MEDIUM (Australian Brown U.C. No. 1) 3 = LARGE (Early Grano)

[8] Shape (see attached chart): 1 = GLOBE (White Sweet Spanish) 2 = DEEP GLOBE (Abundance)
3 = FLT. GLOBE (Australian Brn. U.C. No. 1) 4 = TOP SHAPE (Texas Grano 502)
5 = DEEP FLAT (Granex) 6 = THICK FLAT (Ebenezer)
7 = FLAT (Crystal Wax) 8 = TORPEDO-LONG OVAL (Italian Red)

[0][9] CM. HEIGHT ÷ [0][4] CM. DIAMETER = 2.25 SHAPE INDEX
